

Social Impact:

1. Improved Patient Care: The project enhances patient care by ensuring that healthcare professionals have access to accurate and current information regarding doctor availability. This empowers them to make informed decisions about treatment options, ultimately leading to better patient outcomes and experiences.

2. Efficient Resource Utilization: By streamlining the process of doctor availability tracking, the project enables healthcare facilities to allocate resources more efficiently. Patients receive timely care from available doctors, reducing wait times and enhancing overall healthcare delivery.

3. Enhanced Communication: The project facilitates better communication between healthcare providers and patients by ensuring transparency regarding doctor availability. Patients can access real-time information about available doctors, leading to smoother appointment scheduling and reduced frustration.

Business Impact:

1. Improved Operational Efficiency: By automating the process of doctor availability tracking and facilitating the development of new notifications for unavailability, the project enhances operational efficiency within healthcare facilities. This allows staff to focus on delivering quality care rather than managing scheduling logistics manually.

2. Enhanced Customer Satisfaction: The project contributes to higher levels of customer satisfaction by ensuring that patients can easily find available doctors for their specific needs. This leads to a positive experience for patients, potentially increasing loyalty and word-of-mouth referrals.

3. Competitive Advantage: Implementing a CURA Health project can provide a competitive advantage by offering innovative solutions for managing doctor availability and appointment scheduling. Healthcare facilities that embrace technology to improve patient care and operational processes are more likely to stand out in a crowded market.

Overall, the CURA healthcare project has the potential to make significant contributions to both the social and business aspects of healthcare delivery, ultimately benefiting patients, healthcare providers, and the organization as a whole.
